

Fibre Broadband – Current state of play

Update

Further to the note circulated on 15 March 2016, we are pleased to report that the issue of limited capacity has been rectified by BT Openreach and the great majority of premises that were previously affected are now classified in BT's systems as having fibre broadband available. Therefore it should now be possible for new orders to be placed and for existing orders to proceed.

Just to remind you, there are two ISPs that are offering fibre broadband services over the new network:

Zen Internet – [Online here](#) – 01706 902001

BT Retail – [Online here](#) – 0800 100 400

If you encounter any difficulties that cannot be resolved, in particular if you are told that you cannot order, please let us know at info@gabroadband.net.

Please note that those premises affected by the incomplete build of the network (Town Head, North View and along the road to Bowbridge) are still unable to place orders. Further work has been undertaken in these areas but is not yet completed. We continue to monitor this situation and we will issue further updates when appropriate.

The Directors

Great Asby Broadband
